

BH Thermal Corporation's family of BriskHeat Drum Heaters provide a variety of heating solutions.

The heaters are designed to provide practical, efficient means of freeze protection, viscosity control and maintenance of materials at elevated temperatures. A variety of standard sizes are combined with availability of custom designs to meet a variety of applications.

BH Thermal also offers drum heaters specifically for use on plastic drums. These drum heaters have a lower watt density than others to help prevent hot spots and overheating of sensitive products or the drum itself.

#### **Features:**

- Serpentine woven heating element.
- Multi stranded resistance wire.
- Fiberglass reinforced silicone rubber.
- Variety of Styles to Fit most any Application.

#### **Benefits:**

- Uniform heating.
- Flexibility
- Durability.
- Quick and Easy Installation.
- Moisture and Chemical Resistant Silicone.
- Dielectric Strength Over 2000 Volts.

#### **Applications Include:**

- Viscosity Control.
- Freeze Protection.
- Temperature Maintenance.
- Melting of Solids.
- Heat up of drum contents to a required temperature.
